\$20.10 thru 31-jan-2010

What's new in pdf2image™ v8?

- New lower price – reduced from \$59 to \$39
- Quality setting allows you to manage image quality while decreasing file size
- Added batch capabilities allow user to select and convert multiple files or directories with one click
- TIFF 8-bit color image formats added
- New page range support – convert just one page or a range of pages
- Added CMYK color model option to JPEG output
- Enhancements and advancement of the PDF interpreter
- General performance and fidelity improvements
- Certified for Windows 7 and Windows 2008 Server with 32-bit and 64-bit compatibility (64-bit not native)
- Evaluation version can be used by any user on a system
- New command line access for system integrators and a powerful, yet simple, DLL for non-developers
- New pdf2image Pro line offers price reductions for internal developers and integrators (non-commercial use).
- FLY Server and FLY SDK families for enterprise and commercial development offer more price levels to accommodate small or large scale OEM development.
